

# Achievement Awards

Founded in 1980 Achievement Awards Group is South Africa's leading full service incentive and performance provider to a wide range of leading businesses.

Its rapid growth resulted in them accommodating their staff in three separate locations.

The Executive Directors realised that they needed to centralize their current operation.

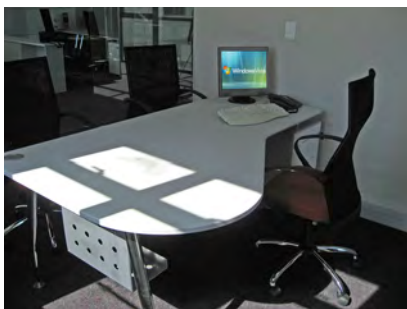

A decision was taken to build a new office complex in Westlake to accommodate the administrative staff and to incorporate their warehouse and despatch facility under one roof.

Trevor Paul of ULTI S.A. was appointed to design and fit out the interior of the building. His brief was to create an upmarket interior with an international feel.

Trevor researched various furniture ranges to achieve the ambience he wanted.

In conjunction with All Office, prototypes were manufactured for comments by Achievement Awards' project team. Of particular importance was cabling and network infrastructure within the desking system.

# Achievement Awards

The range chosen was Benchmark with soft profiled edges and shaped tops for additional user comfort. A combination of grey and white surfaces was used to create a modern look and feel complimenting the cherry panels on some walls.

The use of chrome and vibrant multi coloured Plexi glass panels created a crisp vibrant feel to their call centre HUB.

With Achievement Awards decision to upgrade to flat screen monitors, a rectilinear planning solution provided the best utilization of floor space with ample room to accommodate expansion for the foreseeable future.

All Office has successfully provided Achievement Awards their furniture for over 15 years and was proud to be associated with this project.
