

# INFRARED DIGITAL THERMOMETER

## YOUNGME MODEL YMITF01

Temperature measurement tool for fever.

Can be used on Adults, Children, Toddlers and Infants. (32°- 42.9°) range.

Quick measurement in 1 second, real-time reading, and sound mode.

It can be read clearly using the large backlit LCD screen even in the dark.

### Quick User Guide

- Remove protection from 9V battery
- Place battery in the unit by opening the handle, connecting the battery and reclosing the handle
- Point the Infrared Thermometer towards forehead (either your own or someone else's)
- Ideal distance between 5 and 15cm away from forehead
- Pull and then release the trigger
- Temperature appears on the scanner
- Alarm will sound if temperature is above 38 C
- No calibration required and the Infrared Thermometer switches off automatically after 7 secs.
